BUSINESS ANALYST

Business Analyst | Requirement Gathering | BRD | FRD | UAT | Power BI | SQL | JIRA | Stakeholder Management | Lean Six Sigma

Detail-oriented Business Analyst with experience in requirement analysis, system implementation (CRM & HRMS), process automation, and data visualization. Skilled in translating business needs into scalable solutions, improving operational efficiency, and enabling data-driven decision-making.

WORK EXPERIENCE

Business Analyst

Bigmint Technologies Pvt. Ltd. | 10 June 2024 - Present

System Implementation (CRM & HRMS):

- Conducted requirement gathering sessions with stakeholders, created User Stories, performed Gap Analysis and translated business needs into BRD & FRD documentation.
- Documented As-Is and To-Be processes to support system implementation and process improvements.
- Acted as a liaison between business and IT teams, ensuring clear communication and accurate requirement translation.
- Performed UAT by executing test cases and validating system functionality against requirements.

Process Automation & Data Optimization:

- Prepared process documentation for automation of data extraction workflows across 20+ countries and used JIRA to track project progress and manage task workflows, enabling scalability.
- Contributed to automation initiatives resulting in ~60% reduction in manual effort, improving operational efficiency.

Data Visualization & Reporting:

- Developed Power BI dashboards and reports using SQL queries for data extraction and transformation, for internal use and client requirements across multiple commodities.
- Delivered Power BI training to 60+ employees, enabling adoption of data-driven decision-making.
